Index of Subjects

Abomasum, preprochymosin mRNA, 79
Acetoin, production, acetolactate synthase, *Leuconostoc lactis*, 597
N-acetyl-β-D-glucosaminidase, level, milk, mastitis, indication, 11
Antibiotics, *Staphylococcus aureus*, intracellular, effect on, 513

Bacteria, *see also individual bacteria and types*
contamination, milk, post pasteurization, 59
psychrotrophic, lipase, assay, 123
sampling, milking installations, 547
Bacterial count, milk, volume delivered by standard loop, 317
Butter, composition, sold, Britain, 637

Casein(s), hydration, effect of calcium, 103
micelles, calcium phosphate, 251
glutaraldehyde, fixation, chromatography, 615
zeta potential, 425

κ-Casein, genetic variants, renneting properties, milk, 397
porcine milk, 259
Cheddar cheese, making, chicken pepsin, 331
Cheese, microorganisms, L-phenylalanine, catabolism, 461
Cheese curd, syneresis, microassay, 131
Cheesemaking, *see also* **Cheddar cheese**
microbial coagulants, 141
milk, cold-stored, 629
whey derivatives, viscosity, heat capacity, 455
Clarification, milk, 307
Coagulation, milk, rennet, κ-casein variants, lactation number, effect of, 397
early lactation, 407
homogenized, 417
milk powder solutions, heated, measurement, 325
milk proteins, effect of diet, 69
heated, whey-protein free, effect of 2-mercaptoethanol, 439
evaporated milk, 643
Concentrated milk, *see also* **Evaporated milk**
frozen, study (review), 649
Concentrates, out-of-parlour dispensers, cow-activated, 199
***Corynebacterium bovis*,** udder infection, 371, 379
Cream, storage, viscosity changes, 299

Dairy products, *see also individual products*
preparation for scanning electron microscopy, 605
Diet, milk composition, properties, effect on, 69
Disease, *see* **Mastitis**
Dried milk, solutions, heat coagulation time, measurement, 325
Dried skim milk, lipase determination, 623
sweet whey addition, Zabadi manufacture, 471

Enzymes, *see individual enzymes*
Evaporated milk, heat stability, 643

Fatty acids, dietary, milk composition, yield, 387
Feta cheese, manufacture, microbial coagulants, 141

Gelation, polymer cross-linking theory, 91
Goat(s), milk, dehydration, rehydration, 23

Heat stability, *see* **Coagulation,** milk proteins, heated
Heat treatment, *see also* **Sterilization**
milk, changes at 100–150 °C, 341
Homogenized milk, coagulation, rennet, 417

Keeping quality, pasteurized milk, 59, 569

Lactation, early, chemical composition, coagulating properties, renneted milks, 407
milk yield, projection, part records, 525
number, renneting properties, milk, 397
***Lactobacillus helveticus*,** milk, effect of cadmium, 591
***L. lactis*,** milk, effect of cadmium, 591
***Leuconostoc lactis*,** acetolactate synthase, acetoin production, 597
Lipase(s), assay, *Pseudomonas fluorescens*, 123
milk-, whey-powders, 623
Lipids, mastitic milk, 239
Live weight, plane of nutrition, effect of (review), 149

Mammary gland, *see also* **Udder**
cells, number, activity, milk yield, rat, 29
macrophages, *Staphylococcus aureus*, phagocytosis, 513
plasma cells, 209
Mastitis, control (review), 481
diagnosis, enzymic method, 11
trypsin-inhibitor, milk, 1
milk glucose levels, 233
lipid composition, 239
Microorganisms, cheese, L-phenylalanine, catabolism, 461
Milk, clarification, colorimetric measurements, 307
coagulation, *see* **Coagulation**
low fat, palatability, chemical additives, 447
mastitic, NAGase level, 11
Streptococcus thermophilus, 17
trypsin-inhibitor level, 1
NAGase levels, 227
particles, electrophoresis, zeta-potentials, 425
post pasteurization contamination, 59
UF treatment, composition, 267
Milk composition, after ultrafiltration, 267
Ca + Mg, Ca only, complexometric titration, 477
calcium phosphate, micellar, 251
dehydration, rehydration, goat, 23
diet, effect of, 69
dietary fatty acids, effect of, 387
early lactation, 407
glucose levels, 233
lipids, mastitis, 239
milk protein genotype, effect of, 531

Milk composition (*cont*)
plane of nutrition, effect of (review), 149
vitamins, 37, 51
Milk deposits, plate heat exchanger, UHT sterilization, 557
Milk fat, crystallization, effect of temperature, 579
globules, membrane, chemical composition, homogenized, UHT milks, 289
pasteurized milks, creams, 279
isolation, 113
Milk powder, *see* **Dried milk**
Milk proteins, gelation, polymer cross-linking theory, 91
genotype, milk-yield, -composition, 531
heat stability, *see* **Coagulation,** milk proteins, heated
Milk yield, dietary fatty acids, effect of, 387
goat, dehydration, rehydration, 23
lactation, projection, part records, 525
milk protein genotype, effect of, 531
plane of nutrition, effect of (review), 149
rat, mammary cell number, 29
twin-bearing cows, 365
Milking installations, bacteriological sampling, 547

NAGase, levels, bulk milk, 227
Nutrition, plane, milk yield (review), 149

Pasteurization, milk, shelf life, effect of temperature, 569
Pepsin, chicken, Cheddar cheesemaking, 331
pH, milk, micellar calcium phosphate, solubility, 251
Porter, J. W. G. Prof., obituary, 197
Prazosin, teat sphincter, effect on, 219
Preprochymosin mRNA, abomasum, 79
Pseudomonas fluorescens, lipase, assay, 123
milk-, whey-powders, 623

Rat(s), milk yield, mammary cell number, 29
Rennet, calf substitute, Feta cheese manufacture, 141
coagulation, milk, κ-casein variants, lactation number, effect of, 397
early lactation, 407
homogenized, 417
gelation, polymer cross-linking theory, 91

Scanning electron microscopy, dairy products, etched sections, 605
Skim-milk dried, *see* **Dried skim milk**
Staphylococcus aureus, phagocytosis, mammary macrophages, 513
Sterilization, *see also* **Heat treatment**
milk, UHT, plate heat exchanger, fouling, 557
Storage, cream, viscosity changes, 299
Streptococcus thermophilus, mastitic milk, 17
milk, effect of cadmium, 591

Teat, sphincter, effect of prazosin, 219
Teleme cheese, from cold-stored milk, 629
Trypsin-inhibitor, mastitic milk, 1
Twin-bearing cows, milk production, 365

Udder, *see also* **Mammary gland**
infection, *Corynebacterium bovis,* 371
Ultrafiltration, milk, chemical composition, 267

Vitamins, milk, 37
stored, 51

Whey-powder, -protein concentrate, lipase determination, 623
retentates, viscosity, heat capacity, cheesemaking, 455

Zabadi, manufacture, sweet whey added, 471

Contents

No. 1 (February 1984)

PAGE

Milk trypsin-inhibitor capacity as an indicator of bovine mastitis – a novel principle which can be automated. M. SANDHOLM, T. HONKANEN-BUZALSKI and R. KANGASNIEMI 1

Relationship between the level of *N*-acetyl-*β*-D-glucosaminidase (NAGase) in bovine milk and the presence of mastitis pathogens. B. J. KITCHEN, W. S. KWEE, G. MIDDLETON and R. J. ANDREWS 11

Stimulation of *Streptococcus thermophilus* growth in mastitic milk. V. M. MARSHALL and A. J. BRAMLEY 17

Milk composition and yield of the black Bedouin goat during dehydration and rehydration. E. MALTZ and A. SHKOLNIK 23

Milk yield in rats in relation to activity and size of the mammary secretory cell population. C. H. KNIGHT, A. H. DOCHERTY and M. PEAKER . . 29

Nutrient content of liquid milk. I. Vitamins A, D_3, C and of the B complex in pasteurized bulk liquid milk. K. J. SCOTT, D. R. BISHOP, A. ZECHALKO, J. D. EDWARDS-WEBB, P. A. JACKSON and D. SCUFFAM 37

Nutrient content of liquid milk. II. Content of vitamin C, riboflavin, folic acid, thiamin, vitamins B_{12} and B_6 in pasteurized milk as delivered to the home and after storage in the domestic refrigerator. K. J. SCOTT, D. R. BISHOP, A. ZECHALKO and J. D. EDWARDS-WEBB 51

Origins and levels of post pasteurization contamination of milk in the dairy and their effects on keeping quality. M. J. A. SCHRÖDER. 59

Chemical composition and coagulating properties of renneted Friesian milk during the transition from winter rations to spring grazing. A. S. GRANDISON, G. D. FORD, A. J. OWEN and D. MILLARD 69

Isolation and *in vitro* translation of mRNA from the calf abomasal mucosa and identification of an mRNA coding for a precursor of prochymosin. B. H. NICHOLSON and P. JONES 79

Application of polymer cross-linking theory to rennet-induced milk gels. D. E. JOHNSTON 91

Effect of calcium on the hydration of casein. I. Water vapour sorption and fine structure of calcium caseinates compared with sodium caseinates in the pH range 4·6–8·0. M. RÜEGG and U. MOOR 103

Isolation of bovine milk fat globule membrane material from cream without prior removal of caseins and whey proteins. A. V. MCPHERSON, M. C. DASH and B. J. KITCHEN 113

Evaluation of a fluorimetric assay on the lipases from strains of milk psychrotrophic bacteria. D. STEAD 123

A microassay for the syneresis of cheese curd. M. J. PEARSE, A. G. MACKINLAY, R. J. HALL and P. M. LINKLATER 131

Suitability of some microbial coagulants for Feta cheese manufacture. E. ALICHANIDIS, E. M. ANIFANTAKIS, A. POLYCHRONIADOU and M. NANOU 141

Reviews of the progress of Dairy Science: Long term effects of plane of nutrition on the performance of the dairy cow. W. H. BROSTER and V. J. BROSTER 149

No. 2 (May 1984)

OBITUARY: Professor J. W. G. Porter, M.A., Ph.D. (Cantab.), F.I. Biol. . 197

Some observations on the behaviour of dairy cattle using cow-activated out-of-parlour concentrate dispensers. W. LITTLE and R. D. HARRISON . 199

Distribution, location, and ultrastructure of plasma cells in the uninfected, lactating bovine mammary gland. S. C. NICKERSON, J. W. PANKEY and N. T. BODDIE 209

Effect of prazosin on the function of the teat sphincter in lactating cows. G. VANDEPUTTE-VAN MESSOM, J. BERNABÉ, C. BURVENICH and G. PEETERS 219

N-acetyl-β-D-glucosaminidase (NAGase) levels in bulk herd milk. B. J. KITCHEN, G. MIDDLETON, W. S. KWEE and R. J. ANDREWS 227

Glucose levels in normal and mastitic milk. R. J. MARSCHKE and B. J. KITCHEN 233

Lipid composition of milks from cows with experimentally induced mastitis. E. C. NEEDS and M. ANDERSON 239

Studies on micellar calcium phosphate: composition and apparent solubility product in milk over a wide pH range. L. C. CHAPLIN 251

Purification and characterization of porcine κ-casein. J. CERNING-BEROARD and C. ZEVACO 259

Chemical characterization of milk concentrated by ultrafiltration. M. L. GREEN, K. J. SCOTT, M. ANDERSON, M. C. A. GRIFFIN and F. A. GLOVER 267

Isolation and composition of milk fat globule membrane material. I. From pasteurized milks and creams. A. V. MCPHERSON, M. C. DASH and B. J. KITCHEN 279

Isolation and composition of milk fat globule membrane material. II. From homogenized and ultra heat treated milks. A. V. MCPHERSON, M. C. DASH and B. J. KITCHEN 289

Changes in viscosity of processed creams during storage at 5 °C. K. R. LANGLEY. 299

A procedure for the complete clarification of milk of various species and its suitability for use with colorimetric measurements. A. J. Owen and A. T. Andrews 307

Factors affecting the volume of milk delivered by a standard loop in the plate loop method for bacterial count. J. S. King and L. A. Mabbitt . . 317

An automatic method for measuring the heat coagulation time of milk powder solutions. H. Foissy and W. Kneifel 325

Assessment of the suitability for Cheddar cheesemaking of purified and commercial chicken pepsin preparations. M. L. Green, M. J. Valler and J. Kay 331

Reviews of the progress of Dairy Science: The bacteriological, chemical, biochemical and physical changes that occur in milk at temperatures of 100–150 °C. H. Burton 341

No. 3 (August 1984)

Some attributes of twin-bearing British Friesian and Canadian Holstein cows recorded in England and Wales. P. D. P. Wood 365

Observations on *Corynebacterium bovis* infection of the bovine mammary gland. I. Natural infection. T. Honkanen-Buzalski, T. K. Griffin and F. H. Dodd 371

Observations on *Corynebacterium bovis* infection of the bovine mammary gland. II. Experimental infection. T. Honkanen-Buzalski and A. J. Bramley 379

Effect of inclusion of different forms of dietary fatty acid on the yield and composition of cow's milk. W. Banks, J. L. Clapperton, A. K. Girdler and W. Steele 387

Effects of κ-casein genetic variants and lactation number on the renneting properties of individual milks. J. Schaar 397

Chemical composition and coagulating properties of renneted milks from cows during early lactation. A. S. Grandison, G. D. Ford, D. Millard and A. J. Owen 407

Coagulation of homogenized milk particles by rennet. E. W. Robson and D. G. Dalgleish 417

Measurement of electrophoretic mobilities and zeta-potentials of particles from milk using laser Doppler electrophoresis. D. G. Dalgleish 425

Influence of 2-mercaptoethanol on heat stability of concentrated whey-protein-free milk and formation of soluble casein. T. Aoki and Y. Kako 439

Use of chemical additives to improve the palatability of low fat milk. M. L. Green and E. A. Ridout 447

Viscosity and heat capacity of whey retentates from sheep's milk cheese. F. Fernández-Martín 455

Catabolism of L-phenylalanine by some microorganisms of cheese origin. C. W. Lee and J. Richard 461

Physical and chemical properties of zabadi manufactured from skim milk powder reconstituted with sweet whey. M. S. El-Safty and A. I. El-Zayat 471

Complexometric titration of milk for calcium plus magnesium, and calcium only. L. C. Chaplin. 477

Reviews of the progress of Dairy Science: Mastitis control – progress and prospects. A. J. Bramley and F. H. Dodd 481

No. 4 (November 1984)

Phagocytosis of *Staphylococcus aureus* by bovine mammary gland macrophages and intracellular protection from antibiotic action *in vitro* and *in vivo*. N. Craven and J. C. Anderson 513

Projection of lactation milk yield from part records in crossbred dairy cows. S. B. S. Yadav, J. S. Sharma and O. P. Dutta 525

Effects of milk protein genetic variants on milk yield and composition. D. M. McLean, E. R. B. Graham, R. W. Ponzoni and H. A. McKenzie. . 531

Bacteriological sampling of glass, rubber and stainless steel pipe sections. J. G. S. Speers, S. J. Lewis and A. Gilmour. 547

Fouling of a plate heat exchanger used in ultra-high-temperature sterilization of milk. M. Lalande, J.-P. Tissier and G. Corrieu 557

Effect of pasteurization temperature on the keeping quality of whole milk. M. J. A. Schröder and M. A. Bland 569

Temperature-induced effects on crystallization behaviour, solid fat content and the firmness values of milk fat. J. Foley and J. P. Brady . . . 579

Effect of cadmium on the growth of *Lactobacillus lactis*, *L. helveticus* and *Streptococcus thermophilus* in milk. H. Korkeala, S. Soback and J. Hirn 591

Acetolactate synthase of *Leuconostoc lactis* and its regulation of acetoin production. T. M. Cogan, R. J. Fitzgerald and S. Doonan . . . 597

Preparation of dairy products for scanning electron microscopy: etching of epoxy resin-embedded material. B. E. Brooker and K. Wells . . 605

Fixation of bovine casein micelles for chromatography on controlled pore glass. M. Anderson, M. C. A. Griffin and C. Moore 615

A fluorimetric method for determination of *Pseudomonas fluorescens* AR11 lipase in skim milk powder, whey powder and whey protein concentrate. D. Stead. 623

Effect of refrigerated storage of milk on the manufacture and quality of Teleme cheese. D. Kalogridou-Vassiliadou and E. Alichanidis . . . 629

Composition of butters on sale in Britain. D. H. Buss, P. A. Jackson and D. Scuffam 637

Prediction of the heat stability of full-cream evaporated milk from laboratory observations of coagulation time. E. E. Hardy, A. W. M. Sweetsur, I. G. West and D. D. Muir 643

Reviews of the progress of Dairy Science: Frozen concentrated milk. D. D. Muir 649
